

SETUP PHOTOGRAPHS

This document contains 5 photographs

Photograph No.1
Setup for spurious emission field strength measurements in the anechoic chamber below 30 MHz

Photograph No.2
Setup for carrier field strength, OBW, spurious emission field strength measurements in the anechoic chamber in 30 – 1000 MHz range

Photograph No.3
Setup for frequency stability measurements

Photograph No.4
Setup for occupied bandwidth measurements

Photograph No.5
Setup for conducted emissions measurements on AC power lines
